person re identification is the problem of associating observations of targets in different non overlapping cameras most of the existing learning based methods have resulted in improved performance on standard re identification benchmarks but at the cost of time consuming and tediously labeled data motivated by this learning person re identification models with limited

to no supervision has drawn a great deal of attention in recent years in this book we provide an overview of some of the literature in person re identification and then move on to focus on some specific problems in the context of person re identification with limited supervision in multi camera environments we expect this to lead to interesting problems for researchers to consider in the future beyond the conventional fully supervised setup that has been the framework for a lot of work in person re identification chapter 1 starts with an overview of the problems in person re identification and the major research directions we provide an overview of the prior works that align most closely with the limited supervision theme of this book chapter 2 demonstrates how global camera network constraints in the form of consistency can be utilized for improving the accuracy of camera pair wise person re identification models and also selecting a minimal subset of image pairs for labeling without compromising accuracy chapter 3 presents two methods that hold the potential for developing highly scalable systems for video person re identification with limited supervision in the one shot setting where only one tracklet per identity is labeled the objective is to utilize this small labeled set along with a larger unlabeled set of tracklets to obtain a re identification model another setting is completely unsupervised without requiring any identity labels the temporal consistency in the videos allows us to infer about matching objects across the cameras with higher confidence even with limited to no supervision chapter 4 investigates person re identification in dynamic camera networks specifically we consider a novel problem that has received very little attention in the community but is critically important for many applications where a new camera is added to an existing group observing a set of targets we propose two possible solutions for on boarding new camera s dynamically to an existing network using transfer learning with limited additional supervision finally chapter 5 concludes the book by highlighting the major directions for future research

the application of ionic liquids to biomass for producing biofuels and chemicals will be one of the hot research areas during the next decade due to the fascinating properties of these versatile group of solvents that allow them to dissolve lignocellulosic materials the present text provides up to date fundamentals state of the art reviews current assessments and prospects in this area including aspects of pretreatment fermentation biomass dissolution

cellulose transformation reaction kinetics and physical properties as well as the subsequent production of biofuels and platform chemicals such as sugars aldehydes and acids auxiliary methods such as catalysis microwave and enzymatic techniques used in the transformations are covered both researchers and practitioners are certain to find a wealth of information in the individual chapters which were written by experts in the field to provide an essential basis for assessing possible pretreatment and transformation routes of biomass using ionic liquids and for developing new methods and chemical processes dr zhen fang is professor of bioenergy head of the chinese academy of sciences biomass group xishuangbanna tropical botanical garden and is also an adjunct professor of life sciences university of science and technology of china dr richard l smith jr is professor of chemical engineering at the graduate school of environmental studies research center of supercritical fluid technology tohoku university japan dr xinhua qi is professor of environmental science at nankai university china
